Common Fleet Platform

Implementation Prototypes and Wireframes

Mobility Management System

- Multi-Tenant
- Deployments can be Multi-Regional
- Multiple Modules and Interfaces for Different Roles
  - Mobility Manager
  - Mobility Provider
    - Dispatch, Assignment and Billing
    - Driver Access
  - Rider Access
- Primary Goal is to Track Transportation Workflows Currently Managed By Ad-Hoc Means

Mobility Management System

- Four Primary Modules
  - Mobility Manager
  - Mobility Provider
  - Driver
  - Rider

Mobility Manager Module

- Central Management Application for Locality or Region
  - Used by Local or Regional Mobility Management Office
- Call Center Functionality
- Feeds Data to Other Modules
- Manages Data Sharing with Other Mobility Offices
- Administers Access for Providers and Riders

Mobility Provider Module

- Can be used by any entity that provides transportation associated with mobility management region
- Primarily intended to provide computerized tracking to providers without existing software
  - Promotes Data Accuracy over Pencil and Paper –based Dispatch
- Can be used for work not associated with Mobility Management Office
  - Incentives use of the System
- APIs and batch import available for those with existing software systems
- Data Flows back to Mobility Management Office System

Final Notes

- Full system stack can be shared among several Mobility Offices in a multi-tenant deployment
- External APIs available to integrate with third party software
  - Can also be used to federate operations between multiple regional deployments
- Standardized cloud-based deployment enhances security and reliability
